**CONTENT**

**Underground mining**

*Ermolovich E.A., Kirilov A.N., Ermolovich O.V.* Directional changes in the properties of hardening filling mass through the application of natural fiber material .......... 5

*Zubov V.P., Cao Quoc Viet* Practical experience on using mining systems of thickness and sloppiness coalseams under coal-basin Quang Ninh ........................................ 10

*Zubov V.P., Kovasly E.R., Cao Quoc Viet* Finite-element analysis of strata movement due to mining of coal seam ................................................ 15

*Kondratenko V.E., Devyatyara V.V.* Calculation of the strength of temporary arch support tunnel ............................................................................ 20

*Sakantsev G.G.* Resource-saving technologies in the development of ore deposits using goaf ........................................................................................ 29

*Tkachev V.A., Prozorova Yu.A.* Research into influence of type of support and methods of protection of support and methods of protection of development faces upon stressedly-deformed condition of bearing rock .................................. 38

**Open-cast**

*Grigoryev S.N., Morgunov I.V.* Rationale for the most effective course of mining operations at improvement of medium-sized moulds .......................... 44

*Zhigulskaya A.I.* Influence of additives from wood of a peat deposit on processes of formation of structure in formed peat production ......................... 52

*Klebanov A.F.* Strategy of efficient control over open-pit mineral mining and handling equipment using dynamic information systems ........................................ 55

*Kovalev O.V., Khoang D.N.* Measures for exploitation slope coal seams under open pit mine in conditions of the Numbeo mining in Vietnam ......................... 60

*Mikhailov A.G.* Ecological and technological prospects for mining small primary deposits ........ 65

*Holodnyakov D.G., Loginov E.V.* Mode control of mining operations and the angle of repose of the working pit ........................................................................ 71

**Enrichment of minerals**

*Kharlamova T.A., Alafedov A.F., Bakhir V.M.* Electrochemical activation in technology of enrichment und recycling ores, second resources and water purification .... 75

**Measuring, control, diagnostics**

*Kopylov K.N., Smirnov O.V., Kulik A.I.* Acoustic monitoring of the condition of rock mass and forecast of dynamic phenomena ........................................... 82

*Tavostin M.N., Koshelev A.E., Osipov Yu.V.* Study of physico-mechanical properties of rock salt with the tentative comprehensive loading ........................................ 89

**Chronicle of historical events MGA – MGI – MGGU – MISiS** ................................................................. 97

*Samigullin G.H.* The safety operation of buildings and structures petrochemical facilities and refineries in corrosive conditions ................................. 113

*Tereshin A.A., Alekseev G.V.* Recommended working procedure for geodetic monitoring of deformation of buildings in Russian Orthodox Hermitage on Anzersky Island, Solovetsky Island Group ........................................................... 119

**Building of underground constructions and mines**

*Drozdov A.V.* Mining-and-geological and engineering problems in construction of udachny underground mine ................................................................. 125
Mining cars, the equipment and transport

Zinovieva T.A. Analysis of basic research trends concerned with effect of the grinding charge dynamics on the structural integrity of vibrating mills ........................................ 132

Lekontsev Yu.M., Sazhin P.V. Analysis of operation modes of initiation slot former .......................................................................................................................... 139

Pobegailo P.A. About proportions of the working equipment of hydraulic excavators ...... 143

Poderni R.Yu. World market of advanced extraction-and-loading machines for open pit mining .................................................................................................................. 148

Stepanenko V.P. Analysis of traction coefficient of mine locomotives versus rock abrasiveness .................................................................................................................. 168

Stepanenko V.P., Belozerov V.I. Application of combination (hybrid) power-plants for mine transportation vehicles .................................................................................. 174

Fashchilenko V.N., Varfolomeev S.V. Drive control system for suction-and-exhaust ventilation of processing plants ................................................................. 182

Kholodnikov Yu.V., Boyarskikh G.A. Repair strategy selection and processing equipment upgrading using composite materials ......................................................... 189

Automation and information systems

Valuev A.M. On models and optimization methods for problems of open pit design........ 197

Pevzner L.D., Babakov S.E. Mathematical modelling and control of quarry power-shovel for transportation operations ............................................................... 207

Khorokhonov Yu.B. Features of the design elements of the underground geotechnology in the light of the stress-strain state of mountain ranges in the MSC NASTRAN for windows ................................................................. 223

Aerology, methane, safety

Alymenko N.I., Nikollaev A.V. Method of ventilation mining area potash mines in reverse order mining and quarrying ................................................................. 228

Karkashadze G.G., Hautiev A.M-B. Modeling coal bed degassing with wells considering geomechanical stresses ............................................................... 235

Khyng B.V. Hazard methane on the vietnamese coal mines and prevention measures ...... 243

Kovalev O.V., Khyng B.V. Principles of effective gas drenaige schemes for overmined coal beds considering geomechanical factor ............................................................. 247

Nikollaev A.V. Installation for airing not deep pits and clean issued by the air of dust ...... 250

Nikollaev A.V., Alymenko N.I., Sedunin A.M., Fajnburg G.Z., Nikollaev V.A. Analysis of a air preparation at the mine BPPMG-2 ................................................................. 255

Economics and management

Galiev Zh.K., Galieva N.V., Saratovkin V.F. Operating effect of production plants in cement industry ..................................................................................................... 266

Zhidkova E.V. Research opportunities to attract debt capital companies mineral complex through margin transactions in the stock market ................................................................. 272

Leonova O.A. The problem of economical risk in anti-crisis management at mining enterprises .............................................................................................................. 277

Novoselov S.V. Systematic approach to evaluating the strategic development of the regional fuel and energy complex of russia (questions of theory, methodology and practice) ................................................................. 284

Oganesyan A.S., Agafonov V.V. Systems bases of monitoring of technological objects of management .................................................................................................. 289

Postnikov V.I., Tkach V.R., Agafonov V.V. Optional assessment endorsement of the validity of design decisions coal mines ................................................................. 296
Pchelin A.A. Operating efficiency of financial establishment (bank) in the context of undertaken information security measures ................................................................. 303
Pchelin A.A. Selecting estimation criterion for influence of information security measures on economical effectiveness of a bank ......................................................... 311
Pchelin A.A. Risks for information security of financial establishment (bank) .......................................................... 320
Safonova E.G. Problems of legal regulation of accounting term and sum differences in Russia .............................................................. 329

Electrification mining enterprises
Kostarev I.A., Sapunkov M.L. The development and research into 6–35 kV network protection against ground faults prototype device ........................................ 334
Kokosadze A.E. Underground pumped storage in power engineering ..................... 340

Explosive works
Klishin I.V., Shcheptev E.N., Koltyshev V.N. Development and justification of concentrated greater-diameter explosive charge patterns in block mining ............... 347

Materials
Lavrenenko T.V., Sedykh B.N., Monakov A.S. Effective application of polymeric materials in industry .............................................................. 350

Geology
Vorobjova S.V. Natural types of the pyritaceous ores and criteria for prognosis and search industrial ores (on an example of Ural Mountains) ........................................ 357

Mathematical modeling
Adigamov A.E., Khayrullina A.R. The linear programming method in planning and operating management for production of road concrete mixes ....................... 371
Dedovets M.S., Sen’ko O.V. Methods of reliability analysis based on searching of regularities in data .............................................................. 375
Ksendzenko L.S., Makarov V.V. Method of determining the parameters of the mathematical model the highly compressed rock mass according to the results of experimental studies ......................................................... 379

Works of young scientists
Bashkurov A.Yu. Optimization of centralized and localized energy supply of mineral exploration services customers ......................................................... 386
Nosenko V.V. Principles of mining equipment maintenance management .................. 392
Tadzheddinova A.E. Camels rating system in the context of Russian banking sector 397
Khoang D.N. Analysis of requirements of underground mining under structures and natural objects in conditions of Vietnam ........................................ 401
Shamkeev S.A. Role of the Foreign Investment and the strategy to attract them in the CIS countries .............................................................. 405
Yakovleva T.P. Geoecological aspects of prospecting works. The example of the oil and gas-field placed in Eastern Siberia .............................................................. 411

Preprints
Maslov M.I. The experimental confirmation of the theory of cutter-loader work with vibrating action of the end-effector to the rock’s face ........................................ 54
Fedorov A.V., Kuletsky V.N., Velikoselsky A.V. and other The experience of building management system development coal company ........................................ 59
Krylov I.O., Epikhin A.N., Yushina T.I., Lugovskaya I.G. The use of manganese raw material for high-temperature cleaning of producer gas (syngas) from hydrogen sulfide in coal gasification and large-scale production of coal-family nanotubes (CNTS) ................................................................................................................................. 196

Plotnikov N.V., Goncharuk O.C., Pesotsky A.A. and other Economic security and economic sustainability ................................................................................................. 246

Trubetskoji K.N., Kaplunov D.R., Rylnikova M.V. and other Terms of stable functioning mineral feed complex of Russia. Number 2 ................................................................. 318

Vasychkov Y.F., Fedorova M.A. Classification of unconventional technologies for hard economic minerals extract ........................................................................................................ 356

Shtym K.A., Dorogov E.Yu., Soloveva T.A. and other Experience of effective use of energy resources of the Far East ............................................................................................. 369

Kaplan A.V., Pikalov V.A. Concept, strategy and principles of management of socio-economic development of the mining enterprise ................................................................. 374

Mesyats S.P., Volkova E.Yu., Birukov V.V., Nikitin R.M, Ostapenko S.P., Petrov A.A. Ecological resource use ........................................................................................................ 400

Morgunov Yu.N., Burenin A.V., Aksenov V.P. and other Remote sensing methods, techniques and algorithms in applied research problems in natural environments .......................................................................................................................... 409
