Technical science

<i>Krupskaya L.T., Melkonyan R.G., Mayorova L.P., Golubev D.A.</i> Substantiation of the environmental reclamation of areas subjected to the impact of accumulated ecological damage objects (tailings storages) of mining activities in the Far East Federal District (FEFD)	5
<i>Alekseeva L.B.</i> Requirements for designing mechanisms of glass rod drawing	16
<i>Lyashenko V.I., Dyatchin V.Z., Franchuk V.P.</i> Technical means for extraction and processing of ore materials. Message 2	23
<i>Makhmudov D.R.</i> Effect of blasthole stemming design on rock fragmentation efficiency	42
<i>Pozhidaev Yu.A., Potapov V.V.</i> Analysis of processes in vibrating systems of mining equipment.....	48
<i>Potapov V.Ya., Potapov V.V., Anokhin P.M., Stepanenkov D.D.</i> Selecting informative parameters for asbestos ore separation	53

Earth sciences

<i>Dobrynin I.A., Galushko F.I.</i> New porous saltpeter of the EuroChem Company	64
<i>Kosolapov A.I., Kuznetsov D.V.</i> Assessment methodology relative of opencast mining difficulty in severe climatic conditions	74
<i>Shornikov I.I.</i> Jacking forces prediction for tunnel lining in microtunnelling: boundary values estimation	82
<i>Khachay O.A., Khachay O.Yu.</i> Analysis of seismic response of rocks to blasting using the methods of theory of emergencies.....	88
<i>Rozanov I.Yu., Kuznetsov M.A., Dostovalov R.N.</i> Case history of space geodesy in geomechanical monitoring of rock mass under open pit mining	100
<i>Khloptsova M.V.</i> Problems of geomechanical modeling in mineral mining and underground storage operation	107
<i>Kovalenko A.A., Tishkov M.V.</i> Evaluation of the Udachnaya pipe deposit underground mining using caving system.....	117
<i>Nesterova S.Yu.</i> Integrated evaluation of carnallite bed degassing efficiency under horizontal destressing—degassing slotting	129
<i>Kozyrev A.A., Semenova I.E., Avetisyan I.M.</i> Geomechanical substantiation of deep-level mining at Kukisvumchorr deposit.....	143
<i>Antipenko L.A., Kravchenko A.E.</i> Water—slurry circuits at coal preparation plants: current state and development prospects.....	156

<i>Pavlov A.M., Vasil'ev D.S.</i> Forecast of stability outcrops Konevinskogo deposit	166
<i>Zhuravleva O.G., Avetisyan I.M., Zemtsovskiy A.V.</i> Complexing of seismic data and numerical modeling results on stress state of rocks under rockburst hazard	173
<i>Rybin V.V., Panin V.I., Konstantinov K.N., Startsev Yu.A., Kalyuzhnyy A.S.</i> Monitoring of migration of water-saturated areas for the stability prediction of pitwalls.....	184
<i>Korobova O.S.</i> Opportunities of low-carbon development of the mining region.....	196
<i>Kokosadze A.E.</i> Lithosphere for nuclear and hydro power engineering	200
<i>Aristov A.O.</i> About the applications of quasi-cellular nets in computer-aided simulations of flow-based systems	205
<i>Nagovitsyn G.O.</i> Transition to underground ore haulage in deep open pit mines	218
<i>Svyatetskiy V.S., Kuz E.V., Morozov A.A., Filonenko V.S.</i> Test data on thickening of uranium ore tailings using flocculants at Priargunsky Mining and Chemical Works	229
<i>Khloptsov D.V.</i> Stability of hydrocarbons underground storages' uncased wells with different trajectories	238
<i>Kozyrev A.A., Semenova I.E., Zhuravleva O.G., Panteleev A.V.</i> Assessment of geodynamic and seismic situation near the Saamsky fault	247
<i>Khokhulya M.S., Opalev A.S., Rukhlenko E.D., Fomin A.V.</i> Production of magnetite–hematite concentrate from ferruginous quartzites and warehoused tailings based on mineralogy and technology studies	259
<i>Shevkun E.B., Leshchinskiy A.V., Lysak Yu.A., Plotnikov A.Yu.</i> Features of explosive loosening at the increased intervals of delay.....	272
<i>Lysak Yu.A., Plotnikov A.Yu., Shevkun E.B., Leshchinskiy A.V.</i> Enhancement of seismic safety under blasting	283
<i>Gorinov S.A., Maslov I.Yu.</i> EE initiation by coherent booster	293
<i>Pozdeev I.A., Pozdeeva I.M., Vasil'ev P.V.</i> Rock mass stress state as function of coal strength in the neighborhood of production face	305
<i>Simonov P.S.</i> Features of determining average dimension and yield of oversizes under blasting in open pit mines.....	320
<i>Khachay O.A., Khachay O.Yu., Khachay A.Yu.</i> Complexing acoustic, gravitational and geomechanical fields in hierarchical media.....	328

Works of young scientist

<i>Enkhtur Lonzhid</i> Determination of boundary angles for overburden strata based on physical properties of rocks	337
---	-----

Journal in journal

<i>Ermakov A. Yu., Wahlberg A.V.</i> Method and equipment for determining kinetic constants of low-temperature oxidation of coal.....	345
<i>Kochurov A.N., Senkus V.V., Fomichev S.G.</i> Hydraulic fragmentation of layered-structure coal beds.....	356
<i>Wahlberg A.V., Ermakov A.Yu.</i> Physicochemical justification of determination of kinetic constants for low-temperature oxidation of coal.....	361
<i>Kochurov A.N.</i> Evaluation procedure of production heading face slip volume under hydraulic mining in layered-structure coal beds.....	367
<i>Ermakov A. Yu.</i> Optimization of operating conditions of cutter-loaders in terms of gas content	375
<i>Gorshkov M.D., Senkus Val.V., Ermakov A. Yu.</i> Substantiation of pressurized and free-flow hydrotransport for backfilling in open pit mines	388
<i>Mansurov A.L., Senkus Val.V., Stepanova S.V., Senkus V.V.</i> Complex of mechano-hydraulic mined-land reclamation.....	395
<i>Gushchin A.A., Ermakov A. Yu., Miroshnikov A.M.</i> Analyses of crystallization and consolidation of aqueous reagent solutions to prevent congelation	403
<i>Ermakov A. Yu., Senkus V.V., Potokina M.V., Senkus Val.V.</i> Reclamation of open pit mines using hard residential and chemical waste and untreated and processed waste water.....	409
<i>Senkus V.V., Ermakov A. Yu., Senkus Val.V.</i> Technology for mechanical and hydraulic reclamation of disturbed lands	415
<i>Senkus Val.V., Fomichev S.G., Senkus V.V.</i> Technology of hydraulic land reclamation in open pits.....	420

Special editions GIAB

<i>Rudenko V.V., Shevchuk S.V.</i> Qualimetric evaluation of rock salt in the subsoil use	204
<i>Bekbergenov D.K.</i> Features of the re-mining of ores in collapsed area underground method on the example of the zhezkazgansky deposit	402

The deposited manuscripts

<i>Devyatyarova V.I, Kondratenko V.I, Verzhanskiy P.</i> Prospects for the use of core drilling in quarries for extraction of natural stone.....	47
