Geotechnology

<i>Yakovlev V. L.</i> Methodological framework of the strategy for innovative development of mining systems for deep-seated mineral deposits	6
<i>Belogorodtsev O. V., Nagovitsyn G. O.</i> Technology and sequence of underground mining at Gakman site of Yukspor deposit	19
<i>Kantemirov V. D.</i> Evaluation of engineering solutions on integrated development of Elna magnesite deposit.....	29
<i>Rozhkov A. A., Baranovsky K. V., Smirnov A. A., Solomein Yu. M.</i> Justification of parameters and technology for safe extraction of gold ore reserves from pillars during underground mining	41
<i>Sekisov A. G., Rasskazova A. V., Lavrik A. V.</i> Application of geotechnological methods for the processing of secondary gold-bearing mineral resources of the Far Eastern federal district	55
<i>Smirnov A. A., Baranovsky K. V., Rozhkov A. A., Solomein Yu. M.</i> Cut-and-fill stoping using mixed backfill.....	62
<i>Sokolov I. V., Antipin Yu. G., Nikitin I. V.</i> Efficiency estimation procedure of transition processes in hybrid open pit/underground mining of metal ore deposits.....	77
<i>Sokolov I. V., Antipin Yu. G., Nikitin I. V., Krinitsyn R. V.</i> Justification of design and parameters of mixed mining system for gently dipping low-grade complex ore body	88
<i>Yakovlev A. V., Shimkiv E. S.</i> Problems of ultimate pit limit design.....	105
<i>Yakupov D. R., Ivanova P. V., Ivanov S. L.</i> Physical simulation of load displacement resistance of peat land surface on test bench	117

Mining industrial geology, Mining geophysics

<i>Zuev P. I., Grigoriev D. V., Vedernikov A. S.</i> Geophysical survey of asbestos pit wall.....	131
<i>Lebedev A. A.</i> Intensity and nature of seismic impact of Kostomuksha GOK	142
<i>Sokolov S. Ya., Semenov A. A.</i> Increasing efficiency of geological exploration for dimension stone	152
<i>Timokhin A. V.</i> Geometrization of clay impurity areas in limestone rock mass based on geophysical research	162

Enrichment of minerals

<i>Kantemirov V. D., Titov R. S.</i> Estimation of changes in density of iron ore concentrates under the effect of load versus height of stock piles.....	178
<i>Titov R. S.</i> Influence of morphological types of ilmenite on processability of titanomagnetite ore of Gusevogorskoe deposit.....	192

Geoinformatics

<i>Alenichev V. M.</i> Criteria for system assessment of changes in natural and technological systems in subsurface use	207
<i>Alenichev V. M.</i> Shaping geoinformation system for mine diagnostics.....	217
<i>Osipova I. A.</i> Construction of a model for the representation of knowledge on coal mining in the periods of transient processes	226
<i>Rybnikov P. A., Smirnov A. Yu.</i> Quality analysis of digital terrain models by the remote sensing data: A case-study of the gully-ravine relief.....	235
<i>Yakovlev A. M.</i> Testing of algorithms for automated processing of geological databases in mineral quality control flowcharts	248

Yakovlev A. M. Planning of mining operations in the quality management mode based on geoinformation modeling.....258

Safety in emergency

Maksimov D. A. Clogging of piezometer filters as indicator of impaired permeability of rock-fill embankments270

Maksimov D. A. Impact of impaired permeability on percolating water level and on condition of rock-fill hydrotechnical facility280

Osipova I. A. Transient processes in coal mining292

Production organization and management in mining

Korkina T. A., Rozhkov A. A., Dovzhenok A. S. Analysis of intellectual and innovative potential and motivation of coal mining engineers.....301

Kravchuk I. L., Smolin A. V. Expedience of occupational safety system design in a coal mine316

Nagovitsyn O. V., Voznyak M. G. Robotic mine management326

Nevolina E. M., Shishkina S. V. Development of mine personnel competences as a method to ensure occupational safety336
